

A NEW YEAR

2014 has been a memorable year here at Flow Contract Site Laboratory.

- We celebrated our 5th year in operation
- Expanded our staff by 50%
- Added another cytometer

We are excited to announce that we have expanded our lab to keep up as demand for our services increases, most notably we have added a new BD FACSCanto II flow cytometer.

Our trained staff and third instrument have allowed us to triple our throughput and continue to provide excellent service to our clients.

Providing state of the art flow cytometry services to our clients in the pharmaceutical, biotechnology, and academic industries remains as our focus. We will continue bringing superior value to our customers by providing scientist-to-scientist communication, technical expertise, and fast turnaround times with unrivaled attention to individual samples.

We look forward to another great year of working with our current clients and are excited to meet our new clients for 2015.
